Overview

100 Word Product Description

Add a CORSAIR RS120 120mm PWM Fan to your cooling setup – daisy-chained 4-pin PWM connectors let you link to your other RS fans and control them all through just a single 4-pin PWM header on your motherboard. Enjoy fan speeds up to 2,100 RPM, with the static pressure to also serve as radiator fans. CORSAIR AirGuide technology with anti-vortex vanes directs airflow for concentrated, powerful cooling. Magnetic Dome bearings ensure quieter operation and increased longevity, while Zero RPM mode offers silent operation at low loads.

## Features

- **Streamlined Fan Connections:** Daisy-chain multiple fans together and control them all through just a single 4-pin PWM connector.
- **Precise PWM Speeds:** Set your fan speeds up to 2,100 RPM while providing up to 72.8 CFM airflow to your system.
- **CORSAIR AirGuide Technology:** Anti-vortex vanes direct airflow at your hottest components for concentrated cooling, pushing air in the direction you need when mounted to a radiator or heatsink.
- **High Static Pressure:** RS fans work well as radiator fans with a static pressure of 4.15mm-H2O to push through obstructions.
- **Quiet Operation with Magnetic Dome Bearing:** CORSAIR's Magnetic Dome bearing minimizes noise and reduces friction for greater longevity.
- **Quiet Operation with Magnetic Dome Bearing:** CORSAIR's Magnetic Dome bearing is a refinement of the renowned magnetic levitation bearing, minimizing noise and reducing friction for greater longevity.
- **Zero RPM Mode:** Supports Zero RPM PWM signals to completely eliminate fan noise at low loads.
